

Postdoctoral position in: GENOMIC DISORDERS AND FUNCTIONAL GENOMICS at the Portuguese National Institute of Health (INSA), Department of Genetics (Lisbon, Portugal)

Fellowship conditions:

Please note that funding must be obtained from *Fundação para a Ciência e a Tecnologia* (FCT)

<http://alfa.fct.mctes.pt/apoios/bolsas/concursos/posdoutoramento2009>, through a joint application of the successful candidate together with the head of the research unit. Details of the fellowship are available at the same site. The amount of the fellowship is 1.495€/month.

The expected duration of the fellowship is 3 years.

Job description:

The Post-doctoral research fellow will join an existing research team. The duties of the Research Fellow include development, transfer and/or implementation of new molecular methodologies to be used in this field.

Qualifications and Experience:

Candidates need to have a PhD degree, and will be selected based on their experience in a field related with the topic of the application, publication record, motivation, interview performance and “abilities assessment” (only for short-listed applicants). Applications should include a CV, a motivation letter, a one-page synopsis of current research, and the names and contacts of at least two senior researchers for reference (optionally including recommendation letters) and can be submitted in Portuguese or English.

Closing date for application: 30th of June 2010.

Shortlisted applicants will be notified by email.

Applications should be sent by 30th of June to dezsó.david@insa.min-saude.pt
