

BARCELONA

activity BARCELONA STEP BY STEP

subject **Modernisme: Gaudí and his time**

BCN step by step is a week long programme comprising several courses addressing specific urban themes. Every week we will study one subject intensively.

Barcelona will be used as case study: our aim is to show those circumstances and solutions that can be applied to other situations and places.

Gaudí's architecture has become a landmark and is one of Barcelona's main tourist attractions. However, do we really know what Gaudí sought to achieve? Why and how did he approach his work in that way? What about his colleagues? Can we apply the knowledge about Modernisme to contemporary situations?

The course aims to explain Modernisme architecture in terms of construction and technical logic, pointing out the undying and universal aspects.

BARCELONA

activity BARCELONA STEP BY STEP

subject Religious and Civil Gothic

BCN step by step is a week long programme comprising several courses addressing specific urban themes. Every week we will study one subject intensively.

Barcelona will be used as case study: our aim is to show those circumstances and solutions that can be applied to other situations and places.

Barcelona not only stands out for its religious Gothic buildings, but also offers some excellent examples of civil Gothic architecture. We will consider both. A range of case studies - buildings that are still in use - will show the most relevant features of the gothic logic. We will learn about the precision of the gothic structural system and will analyze how the structural conditions shape space and form.

BARCELONA

activity BARCELONA STEP BY STEP

subject **BCN modern and contemporary architecture and urbanism**

BCN step by step is a week long programme comprising several courses addressing specific urban themes. Every week we will study one subject intensively.

Barcelona will be used as case study: our aim is to show those circumstances and solutions that can be applied to other situations and places.

The image of Barcelona's recent mediatic icons is so strong that it hides the real urban and architectural value of our city. The aim of the course is to discover and analyze those developments (buildings and public sites) of the last 50 years that contribute to Barcelona's remarkable quality of life.

BARCELONA

activity BARCELONA STEP BY STEP

subject **Barcelona urban space**

BCN step by step is a week long programme comprising several courses addressing specific urban themes. Every week we will study one subject intensively.

Barcelona will be used as case study: our aim is to show those circumstances and solutions that can be applied to other situations and places.

Barcelona, as a paradigmatic example of the Mediterranean city, offers a wide range of public spaces to accommodate all kinds of human activities. The course will focus on the specificities of this urban form, by studying both the general features and the particular Barcelona ones. A collection of case studies - analyzed in social, morphologic, formal... terms - will illustrate why and how public space contributes to conviviality.

BARCELONA

activity BARCELONA STEP BY STEP

subject Barcelona: 2000 years of urban development.

BCN step by step is a week long programme comprising several courses addressing specific urban themes. Every week we will study one subject intensively.

Barcelona will be used as case study: our aim is to show those circumstances and solutions that can be applied to other situations and places.

The course seeks to explain the actual cityscape of Barcelona looking at its historical evolution. Which architectural periods are most relevant? What events have directly influenced the growth of the city? How has planning shaped the urban fabric? What responsibility falls on architecture? By walking through Barcelona we will understand its idiosyncrasies and at the same time discover which aspects are universal and therefore "exportable".
