

# International Female Program

## Collaborative Research Centers, SFB 880

### Fundamentals of high-lift for future commercial aircraft

#### Program Description:

The international female program is a new SFB 880 initiative aimed at increasing the number of female researchers in the collaborative research center. The program is 6 months long and is aimed at female candidates who finished their Masters or their Doctorate degree and are interested in experiencing firsthand the research environment at TU Braunschweig and DLR. Each participant is paid for her research work based on 50% capacity for a E13 position (around 1078€ per month after deductions). The candidates can select from several projects from various fields in the SFB 880. The description of each project can be found on the SFB 880 website under: <https://www.sfb880.tu-braunschweig.de/index.php/en/services-en/international-female-program>

Beside the scientific work, the program also offers the participants the opportunity to partake in intensive German language courses. The candidate will be enrolled in the proper language course level based on a placement test. All fees related to the intensive German language courses are paid by the program.

#### Application Process and deadlines:

The program is offered twice a year in parallel with the university semesters. The deadline for the next summer semester is **March 15, 2013**. The deadline for the following winter semester is **September 15, 2013**. To apply, the candidate needs to provide a copy of the following documents:

1. copy of passport/ ID
2. Curriculum Vitae including complete address, phone number, email address, educational background, and work experience
3. Certified copies of bachelor diploma and transcript of grades in original language and in English or German translation
4. Certified copies of master diploma and transcript of grades in original language and in English or German translation
5. letter of intent
6. any German or English language certificate (when applicable)

Applications and questions are referred to Dr. Richard Semaan (contact info below).
